

MULTICYCLE

Premium Dutch bike craft. Since 1977.

# HISTORY OF MULTICYCLE

**Multicycle is a rock-solid Dutch brand.** After working for a wholesaler and bicycle brand, technology passionate Nico Bieleveldt founded Multicycle in 1977. At that time there was a strong demand for recreational bicycles, but the user-friendliness often left much to be desired. Multicycle responded to this with handmade bicycles that offered both comfort and quality.

The passion of the professionals behind Multicycle regularly led to innovation. A breakthrough was the freewheel gear system in the crank, which made shifting much easier as opposed to a conventional derailleur. Multicycle also often attracted attention with other innovations, such as with hydraulic brakes and the first battery-operated lights.

Due to the high-quality and qualitative finishes, various dealers compare Multicycle to luxury and exclusive car brands. The fact that the dealer has virtually no work left on the Multicycles that he receives is a major contributor to this.

The qualitative and high-quality finish of Multicycle is reflected in all kinds of details, such as high-quality parts, beautifully finished joints and lightweight frame.

This passion for cycling and an eye for detail is also reflected in the current Multicycle e-bike collection. The e-bike collection consists of five models that are suitable for every type of cyclist.

All e-bikes are equipped with a Shimano e-bike systems. The frames, the drivetrain and assembly of the e-bikes are also very advanced. All e-bikes are equipped with the very best parts.

The e-bikes are perfect for the cycling enthusiast as well as for the younger audience.

**Young or old, the consumers Multicycle focuses on have one thing in common. They all value quality.**

## Solo EMS

Characteristics of every Multicycle:

- ✓ 5 year battery warranty
- ✓ Models for men and women
- ✓ Excellent cycling comfort
- ✓ Shimano e-bike system

# CYCLING WITH PASSION

A leisurely bike ride through beautiful nature? Popping into the city for a few errands? Multicycle's renewed e-bike collection offers a range of models to suit all your needs.

Our beautiful e-bikes are equipped with a Shimano mid-motors. Our frames, the drive system and the assembly of our bicycles have also been developed extensively to offer you an e-bike that fully meet your every need and wish.

## **All e-bikes are finished with the very best parts.**

We work with top brands and have chosen quality and proven technology. This ensures that our e-bikes are not only beautiful, but also highly reliable.

**At Multicycle, we make bicycles with passion and this philosophy is reflected in every Multicycle bike. You can always count on making memories on your Multicycle.**

## Flowchart for selecting your e-bike

E-bikes come in many shapes and sizes. Which e-bike is right for you depends on your specific wishes and requirements. In our brochure, we have therefore included a flow chart that allows you to make a few choices to arrive at the e-bike that suits you best.

You can read more in the following paragraphs about the choices available to you.

## Integrated battery or battery on the carrier?

One of the first choices to make is where you would like the battery to be installed. At Multicycle, we offer e-bikes with both an integrated battery and a battery on the carrier. All batteries on our e-bikes are removable. An e-bike with an integrated battery generally offers added stability, because the battery is in the centre of the bike.

If you are going for an integrated battery, you have the choice between the Prestige EMS, the Legacy EMB and the Voyage EMI. If you prefer the battery on the carrier, you can then choose the Solo EMS or the Solo EMI.

6

## Derailleur or hub gear?

After you have determined the location of the battery, the next choice presents itself. Will you choose a derailleur gear or a hub gear? This choice is best based on the use of your e-bike. If you cycle mainly short distances, a low-maintenance hub gear will suit your needs. Do you prefer to go on long rides through mountainous landscapes? Then a derailleur is a good option. A derailleur gear has a greater range of resistance and is lighter. Our Prestige EMS and Solo EMS have a derailleur gear. The Legacy EMB, Voyage EMI and the Solo EMI have hub gears.

## Belt or chain drive?

Finally, you have the choice between a belt and a chain drive. A belt is a low-maintenance drive. It is a smooth-running drive system with a long lifespan. As a belt is a drive system that is not lubricated, there is no need for a chain box.

A chain drive is the lightest running and most sportive system. Would you like an e-bike with a belt drive? Then choose the Legacy EMB. Are you going for a chain drive? Then choose the Prestige EMS, Voyage EMI, Solo EMS or Solo EMI.

With the Shimano app E-TUBE PROJECT, you can easily adjust switch settings and retrieve battery information. **SHIMANO**

MULTICYCLE®  
**Prestige EMS**

Luxury and comfort. The ultimate biking experience.

**performance**

# THE 5 YEAR BATTERY WARRANTY FROM MULTICYCLE

---

The battery is a valuable component of an e-bike. We do everything possible with our warranty conditions to ensure that you can enjoy your e-bike without worries.

The batteries are equipped with high quality lithium-ion cells. This ensures that the capacity drop is very slow and the batteries therefore last longer.

Should you run into problems with the battery, you can have the battery checked at a dealer in your area. If the battery no longer performs as you may expect: Multicycle offers a 5-year warranty.

Ask for the conditions.

## POWER AND AGILITY: SHIMANO E-BIKE SYSTEM

---

Shimano STEPS mid-motors have a large peak power output, providing even smoother support uphill and when accelerating. A nice feature is that the system is optimized for electronic shifting. A combination that guarantees perfect shifting performance. These motors have an extremely low weight and are built for use in all weather conditions.

All our e-bikes are equipped with the Shimano Steps E6100 or the Shimano Steps E5000.
